

MBR Electric, Inc.

To whom it may concern:

I write this letter in recommending Johan Ollarves as a Firestopping Foreman with Rolling Plains Construction Company. I had the pleasure of working with Johan on a project name DAS SURVIVABILITY UPGRADE at the Denver international airport in 2022. I can recommend him highly and without reservation.

Throughout the course of the project, Johan was an absolute professional. He was accurate in his initial assessment of what needed to happen for each fire system and was in contact with Hilti personally dealing with creating Engineering Judgments. He managed well as the foreman, keeping record documents and as-build drawings. He also worked very well with the 3rd party inspectors, making sure everything was installed per EJ and/ Hilti system.

Our job was done with care and precision. Johan oversaw bringing 6 communication rooms up to a 90-minute fire rating and 1 bigger server/ communication room up to a 60-minute fire rating. He is a very hard worker and gifted fire stopper. This project was very difficult to take on, and Johan did not hesitate to keep moving it forward even with the obstacles at hand. Johan worked in finished areas, occupied with data servers and above ceilings with special fire suppression systems that would have to be disarmed and rearmed daily.

In addition, he is extremely clean and tidy in the workplace. He and his assistants never left the worksite in disarray. They vacuumed all dust daily. Johan took to the time to close all ceilings that he may have been working in and neatly stored all materials and tools together for the next shift. He was in constant communication with the general contractor throughout the project. Although our project took time to complete, I think it would have been a lot more difficult working with someone else.

Scott King
